

# RIDHDHI GHADIYA

## MOBILE APP DEVELOPER (FLUTTER)

Experienced Flutter Developer with 4+ years in designing and optimizing high-performance mobile apps. Skilled in Flutter, Dart, state management, and API integration, with extensive Firebase experience for backend services. Known for delivering robust solutions in agile environments and staying current with industry trends to ensure high-quality, user-focused applications.

---

### SKILLS

- Flutter Development
- Dart Programming
- Firebase
- Figma

---

### EDUCATION

Bachelor in Computer Application  
Saurashtra University | 2017 - 2020

---

### EXPERIENCE

#### MOBILE APP DEVELOPER

Divine Systems (2020-2022)

Experienced in .NET Core API development and cross-platform Flutter app design using MVC. Proficient in Android app deployment, optimized tablet layouts, and multi-device testing.

#### MOBILE APP DEVELOPER

Startline Solutions (2022-2023)

Integrated Firebase Cloud Messaging for push notifications and real-time updates, enhancing user engagement. Managed background services, notifications, and implemented multi-language support for global reach.

#### MOBILE APP DEVELOPER

Solguruz LLP (2023-2024)

Built custom menus, dialogs, and notifications with Firebase backend support. Implemented state management (Provider, Bloc, GetX, MobX) for efficient app performance and collaborated on debugging for seamless functionality.

## PROJECTS

### • **SME CARGO BUSINESS**

- Integrated Firebase Cloud Messaging for push notifications and real-time updates, enhancing user engagement.
- Managed background services, notifications, and implemented multi-language support for global reach.
- **App Link:** [https://play.google.com/store/apps/details?id=com.smecargo.deliveryapp&hl=en\\_IN](https://play.google.com/store/apps/details?id=com.smecargo.deliveryapp&hl=en_IN)

### • **E-COMMERCE APP (REAL TIME ACTIVITY)**

1. **Parmeshwari**
  2. **Moti Jewellers**
  3. **KJ Jewellers**
  4. **Mahalaxmi Jewellers**
- The e-commerce app for jewelry leverages Socket.IO for real-time rate updates, ensuring users receive the latest pricing instantly.
  - Built with GetX for efficient state management and other advanced technologies, the app delivers a seamless and interactive shopping experience, allowing customers to view and purchase jewelry with up-to-date information and a smooth user interface.

    - [https://play.google.com/store/apps/details?id=com.kjjewellery.kjjewellery&hl=en\\_IN](https://play.google.com/store/apps/details?id=com.kjjewellery.kjjewellery&hl=en_IN)
    - [https://play.google.com/store/apps/details?id=com.shreemahalaxmijewellers.cfacing&hl=en\\_IN](https://play.google.com/store/apps/details?id=com.shreemahalaxmijewellers.cfacing&hl=en_IN)

### • **KASFOOD**

- I worked on a vegetable and fruit order-to-delivery app, which includes two distinct applications: one for managing orders and another for handling deliveries.
- The app utilizes BLoC (Business Logic Component) for state management, ensuring a clear separation of business logic from the UI and providing robust, maintainable code for handling complex order and delivery processes efficiently.

### • **ZEE-NEWS**

- I developed the WorldCup2024 app as a component of the Zee News app, collaborating closely with an external team to integrate features and ensure seamless functionality.
- This project involved coordinating with various stakeholders to deliver an engaging and informative app experience, keeping users updated with the latest World Cup news and scores.
- In addition, I integrated iZooto notifications across the Zee News app, enabling real-time push notifications to keep users informed with the latest updates, news, and alerts, enhancing user engagement and interaction with the app.
- **App Link:** [https://play.google.com/store/apps/details?id=com.zeenews.hindinews&hl=en\\_IN](https://play.google.com/store/apps/details?id=com.zeenews.hindinews&hl=en_IN)

- **LUNE**

- I led the development of Lune, a cutting-edge music system that visually synchronizes rhythms on-screen with the music being played.
- The Lune app enhances this experience by dynamically displaying rhythmic patterns and lyrics, creating an immersive and interactive way to engage with music.

- **DIAMOND APP**

1. **SL Diamond**
2. **Samir Gems**
3. **Rubin Zonen**
4. **Unique Gems**
5. **ADMP GLocal**

- Diamond apps combines luxury and convenience with advanced functionalities.
- It features sophisticated search capabilities, diamond pairing options, saved search criteria, and demand requests for hard-to-find gems.
- The app's state management Provider, ensures a smooth and responsive user experience.
- Users can view diamonds in various formats, access detailed images, videos, and certificates, and efficiently manage their preferences and orders, all within an intuitive and high-end interface.

  - [https://play.google.com/store/apps/details?id=com.samir.diamonds&hl=en\\_IN](https://play.google.com/store/apps/details?id=com.samir.diamonds&hl=en_IN)
  - [https://play.google.com/store/apps/details?id=com.unique.diamonds&hl=en\\_IN](https://play.google.com/store/apps/details?id=com.unique.diamonds&hl=en_IN)

- **JALSO**

- I played a pivotal role in the development of the Jalso app for Gujarat Samachar, dedicated to delivering a rich array of pure Gujarati content, including songs, ghazals, poetry, and podcasts.
- This app, designed with MobX for efficient state management, offers a seamless and intuitive user experience, ensuring smooth navigation and real-time updates.
- By focusing on the cultural and linguistic nuances of Gujarati media, Jalso provides a comprehensive platform for users to enjoy and engage with their favorite regional content effortlessly.
